

Victa Lawnmower Assembly and Owner's Manual

WARNING! Read this manual before operating your VICTA Lawnmower.

IMPORTANT INFORMATION

Labels

The following warning labels are attached to your mower on purchase. Please read before discarding.

2 Stroke Label

Victa 2 Stroke Engine

Fuel Oil Ratio 25:1 = 200ml of Oil for 5 Litres of Fuel

Victa Formula V 2 Stroke High Performance Motor Oil (fuel oil ratio 50:1)
100ml of Oil to 5 Litres of Unleaded Fuel.

PLEASE NOTE 50:1 OIL RATIO IS ONLY WITH
APPROVED “VICTA FORMULA V 2 STROKE OIL”

4 Stroke Label

Briggs & Stratton Engine

Engine must have 600ml off S.A.E. 30 Oil *placed in the Sump Before Starting*

Honda Engine

Engine must have 550ml of S.A.E. 30 Oil *placed in the Sump Before Starting*

Dust Cap

(Victa 4 Stroke Briggs & Stratton Mowers Only)

Removal of Blue Dust Cap

Dispose of dust cap from under fuel cap before initial filling
DO NOT REPLACE

IMPORTANT NOTES

Congratulations on your purchase of a top quality VICTA lawnmower. This instruction manual will aid in the assembly, operation and maintenance of your new lawnmower.

Please read carefully ensure safety and the long life of your product.

Do not operate the unit before reading this manual.

Do not operate before reading the 'Engine Manual'.

Keep this instruction manual in a safe place for future reference or if service is required on your unit.

Please read the 'Warranty' section carefully

Unit Details

When unpacking the unit, ensure that all component parts listed below have been provided. Should there be a problem, notify the place of purchase.

You should find the following enclosed:

- 1 VICTA lawnmower
- 1 Unassembled grass catcher & assembly kit (Catcher models)
- 1 Engine manual
- 1 Mulching plug (Mulch or Catch models only)

Safety Instructions

Transporting the mower

- Turn the engine off, by moving the throttle lever to the 'STOP' position and switching the fuel tap off (where fitted).
- Disconnect the spark plug lead and wedge it between the cylinder head fins.
- Do not transport the mower in a vehicle if there is fuel in the fuel tank.
- Remove the starter key and disconnect the battery (Keystart models only).

Before using the mower

- Do not start the mower until you have studied the instruction manuals.
- Know the mower controls. Learn how to stop the engine quickly in an emergency by moving the throttle to the 'STOP' position.
- Before using the mower, ensure that the blade assembly is not worn or damaged. Always replace worn or damaged blades and bolts in sets to preserve correct balance. Damaged or worn blades and bolts are major hazards. Use genuine VICTA spare parts only.
- **Please note blades are tucked under blade disc for safety and transport reasons before use. Once the engine is started they will relocate themselves for cutting.**
- Check all fasteners regularly. Always ensure the mower is in a safe operating condition.
- Check for grass build up around the engine and muffler which may cause overheating and/or a fire hazard.
- Do not start the engine unless the rear flap and/or grasscatcher are securely in position.

Operating the mower

- Do not mow while people or pets are in the vicinity of the mower or within the mowing area. Ensure that bystanders are a minimum of 15 metres away.
- Do not mow in bare feet or open shoes. Wear long trousers and heavy footwear.
- Make sure the lawn is clear of sticks, stones, bones, wire and debris before mowing. These could be thrown by the blades and cause injury or damage.
- Start the engine carefully with feet well clear of blades. Do not tilt the mower when starting the engine.
- Stop the engine whenever you leave the mower, even for a moment.
- Mow only in good daylight.
- Keep hands and feet away from rotating parts beneath mower when engine is running.
- Do not over speed the engine or alter the governor settings. Excessive engine speed is dangerous and shortens mower life.

SAFETY & HANDLING

Safety Instructions

- **Never lift, carry or tilt the mower when the engine is running.**
- Stop the engine before pushing the mower across gravel, paths or roads. Stop the engine before the mower leaves the lawn.
- Stop the engine before adjusting the cutting height.
- Mow across the face of a slope, never up or down. Use extreme caution when changing direction on a slope. Do not mow on excessively steep slopes.
- Never mow by pulling the mower towards you. You may slip and pull the mower on top of your feet.
- Walk with the mower, never run.
- The safety distance determined by the guiding handles must be maintained at all times.
- At the conclusion of mowing, always turn the mower off using the throttle lever then turn fuel tap off (where fitted).

Maintaining the mower

- If the mower begins to vibrate abnormally, or if it strikes a foreign object - STOP the engine, disconnect the spark plug lead from the spark plug and carefully wedge it between the cylinder fins. Inspect the mower and blades for any damage.
- Replace worn or faulty mufflers as they adversely affect engine performance and increase emissions.
- VICTA recommends that all maintenance, repair and inspection work be carried out by a VICTA Authorised Service Centre.
- Store the mower in a well ventilated area, away from any naked flames such as those found in hot water heaters.

Refuelling the mower

- Refuel the mower outdoors only.
- Do not smoke when refuelling the engine. Never add fuel or remove the fuel cap while the engine is running or hot. If fuel is spilt, do not start the engine. Move the mower away from the area of the spill. Do not create any source of ignition until fuel vapours have dissipated.
- Store fuel in a cool place and in a container specifically designed for the purpose. VICTA supplies a 5 litre fuel can as an optional extra. Plastic containers are unsuitable, except those specifically designed to hold fuel.

Hazards

The following safety precautions must be strictly observed to avoid the risk of damage or personal injury.

- Do not smoke while operating or refuelling the mower. Never add fuel or remove the fuel cap while the engine is running or hot. If the fuel is spilt, do not start the engine. Move the mower away from the area of the spill. Do not create any source of ignition until the fuel vapours have dissipated.
- Check all fasteners regularly. Always ensure that the mower is in safe operating condition. Use genuine spare parts only.
- Do not operate the mower in confined spaces where exhaust fumes (carbon monoxide) can collect.
- Stop the engine whenever you leave the mower, even if only for a moment.
- Stop the engine when emptying the grasscatcher. Never try to clear grass from inside the mower while the engine is running.
- Never lift, carry or tilt the mower when the engine is running.
- Bystanders must be at least 15 metres away during operation of the mower, as rocks and other materials may be thrown at high velocities. Switch the unit off immediately if approached.
- Never use the mower unless the grasscatcher and/or the rear flap are correctly assembled and fitted.

Personal Safety Equipment

Recommended safety equipment to wear when working with your lawnmower:

A set of ear muffs.

A pair of protective gloves.

A pair of safety boots.

Eye Protection.

ASSEMBLYPROCEDURES

Grasscatcher

Assembling the Grasscatcher

- 1 Assemble the adjustable covers 1A or directional covers 1B to the top half of the grasscatcher (if applicable to your model). Check that all of the snap hooks have engaged securely.
- 2 Locate the centre protrusion of the mesh into the centre hole on the inside of the catcher top, ensuring the curved edge of the mesh faces the rear handle. Firmly push the mesh into the top half of the catcher, making sure that the four snap hooks engage securely.
- 3 Loosely locate the rear handle areas of the top and bottom catcher halves then loosely locate the side edges. *Check that all eight hooks from the top half are loosely located in the slots on the bottom half **then** firmly push the two halves together over each snap hook.* Check that all of the snap hooks have engaged securely.
- 4 Tighten the two screws fitted to the front of the catcher.

Grasscatcher

Fitting the Grasscatcher

- Stop the engine.
- Raise the rear flap. Locate the grasscatcher tongue over the rear axle and insert the grasscatcher under the rear flap.
- Lower the rear flap to retain the grasscatcher .

STOP the engine before fitting or removing the grasscatcher.

Never use the mower unless the grasscatcher and/or the rear flap are correctly assembled and fitted.

Handle Knobs/Toggles

Mowers will have either knobs or toggles to fix the handles in position. Refer to the instruction below which is specific to your particular model.

- Tighten the handle knobs to secure the upper handle to the lower handle.
- Flip the handle toggles to secure the upper handle to the lower handle.

When folding or unfolding the handles, ensure that the starter switch lead is not caught or stretched (Keystart models only).

ASSEMBLYPROCEDURES

Mulching Plug

(Mulch or Catch models only)

- Stop the engine and set the mower height setting.
- Mulching is most effective between height settings 4 and 10.
- Lift the rear flap and identify the support plate as shown. Note the orientation of the mulching plug.
- Insert the mulching plug into the baseplate.
- Ensure that the mulching plug is resting on the support plate and is positioned against the inside of the baseplate. Push the mulching plug down so that it rests flush against the rear cross member.
- Close the rear flap ensuring that it closes fully. The rear flap should rest on the mulching plug as shown in the sectional illustration.

STOP the engine before inserting or removing the mulching insert.

Aerogrip Handle Assembly

Your Aerogrip handle may require some assembly before its first use. If the upper and lower handle have been supplied unattached, follow these instructions below.

PIVOT JOINT COMPONENTS

ITEMS	QTY
1. Upper Handle	x 1
2. Centre knuckle	x 1
3. Inner mating pieces	x 2
4. Outer mating pieces	x 2
5. Fastening knobs (incl. bolt)	x 2
6. Lower handles	x 2

Assembly Procedure

1. Unscrew fastening knobs and outer mating pieces from each side of pivot joint assembly.
2. Lay the upper handle across the engine cowl of the lawnmower, with the bend facing down (see fig 1).
3. Position the ends of the upper handle over the lower handles at the pivot joint, so that the holes are all aligned.
4. Replace the outer mating pieces on each side and partly tighten into place with fastening knobs, but do not fully tighten yet (see fig 2).
5. The Aerogrip handle may now be lifted into its normal operating position, and the fastening knobs fully tightened.

Fig 1.

Fig 2.

ASSEMBLYPROCEDURES

Attaching The Remote Air Filter Housing – Aerogrip Handles

2 Stroke Models

Fig 3.

4 Stroke Models

Fig 4.

2 Stroke Models

Slide the air filter housing onto the upper handle. Position locating lug into hole in handle and secure with screw (see Fig.3). Be careful not to over tighten, as the plastic thread may be damaged.

4 Stroke Models

1. Firstly secure the throttle control to the right hand side of handle, on the outside (see Fig. 4) using the 50mm screw and nut pictured here.
2. For models supplied with remote air filter. After attaching the throttle control, secure the air filter housing to the right hand side of handle, on the inside (also fig 4), using the 38mm screw & nut pictured here.

Height Adjustment

Height adjustment allows lawn to be cut at different lengths.

- Set cutting height by adjusting the height lever.
- For Mulch or Catch models, mulch grass between settings 4 to 10.
- A lower setting may be used depending upon conditions.

STOP the engine before adjusting the cutting height.

Mowing & Mulching Tips

- A mulching mower is designed to cut, retain, and recut the clippings until they have reached a very small size. These are then blown down into the root system as nutrients for your lawn.
- For best mulching results only mow the top 1" / 2.5cm of lawn growth. If grass has become excessively long choose a height setting and gradually reduce the cutting height after each pass, or use catcher.
- Mulch grass between heights settings 4 and 10. A lower setting may be used depending on conditions.
- Dry grass will aid in the mulching action of the mower.
- Cut the grass regularly to avoid it becoming too long and making it difficult to mulch.
- As a general rule, only cut the top one third of the grass length (approximately). More than this may leave an untidy appearance and finish.
- Mulching is sensitive to the chosen height setting. If the height setting is too low cut grass may be left on top of the lawn. In this case raise the height setting.
- Cut the grass in the late afternoon or morning. This will stop the grass being damaged by direct sunlight.
- To maintain cutting performance keep the underside of the mower clean.
- The cutting pattern should be varied from week to week (eg. North-South to East-West).
- When using a mulcher the grass tends to be carried along with the mower. Mow from the thick grass to light grass as this will deposit clippings and encourage growth in these areas.
- Excessively long grass will not be mulched adequately, in this case, it is recommended to use catcher.
- Worn or incorrect blades will reduce lawn finish and will not mulch properly. Use only genuine Victa blades and replace them regularly.

MAINTENANCE & CARE

Cleaning

Before cleaning the mower, ensure the throttle lever is in the 'STOP' position. Turn the fuel tap off, disconnect the spark plug lead and wedge it between the cylinder fins, and disconnect the battery on Keystart models.

- Remove grass build up from the air intakes on the top of the mower cowl, around the engine and carburettor, and around the air filter body.
- The underside of the mower should be cleaned regularly to remove dirt and grass build up, as any build up will adversely affect grass catching and mulching performance and can promote corrosion on steel baseplates.

- **When cleaning the underside of the mower, always tilt handle back to ground level so the front wheels are off the ground and spark plug is pointing to the sky. Tilting in other directions can cause the oil to contaminate the fuel & damage airfilter causing starting difficulties.**
- A hose may be used on the underside of your mower **ONLY**. Care must be taken to **NOT** get water into the engine, as it may damage the magneto or get into the fuel system.
- If your mower is fitted with a washport, simply attach a garden hose whilst the engine is running and turn on the water.
- On Keystart models keep the battery, starter switch, starter motor and all leads dry.
- To prevent chassis corrosion, the underside of your mower should be cleaned immediately after mowing an area which has been recently dressed with sulphate of ammonia or fertiliser.
- After cleaning, run the engine briefly to dry off excess moisture before storing.

Blade Replacement

(All Models)

Model	Blade & Bolt Set
All 19" Steel & Alloy Chassis Models	CA094705

For Your Safety

- Never use the mower unless the grasscatcher or the guards supplied by the manufacturer are in position.
- Before starting the mower check blades and bolts for damage or wear.
- If you strike an obstruction, stop the engine and check the blades for damage.

Worn and damaged blades are major hazards.

- Stop the engine and disconnect the spark plug lead before fitting new blades.
- Work from the catcher flap.

With the rear flap secured, undo the blade nut, applying upward pressure to the bolt head into the blade disc. (the head of the bolt will not rotate due to the diamond shape in the underside of the head).

Assembly: Fit as per the drawing remembering to push the head of the bolt into the blade disc. (this will stop the bolt head from turning). Ensure correct order of assembly.

DO NOT lay mower on side (4 stroke models).

- We recommend changing blades, bolts, nuts and washers as a set. Metal fatigue and damage may occur which may not be visible to the operator. Always replace all blades to ensure correct engine balance, reducing vibration and wear. Tighten nuts on blade bolts to 14-19 Nm (Newton Metres) or 10-14ft lbs.
- **Always turn the nut to check tightness, not the bolt.**

Use only genuine replacement parts made and guaranteed by Victa. Insist on them from your parts and service dealer.

Detailed fitting instructions are printed on genuine Victa blade packs.

Use of non-genuine blades may void your warranty, and could result in damage or injury.

MAINTENANCE & CARE

Remote Air Filter Maintenance

For correct engine performance and to guard against dust entering the engine, causing rapid wear, the air filter assembly must be clean and maintained in good condition. VICTA recommends that the air filter element and seal ring are replaced annually, or more often in dusty conditions. Always replace with genuine Victa spare parts. Use of non-genuine spare parts may damage your mower engine, and void the product warranty.

Replacing Air Filters

STOP ENGINE.

(Fig. 1) 4 stroke models, twist filter cap anti-clockwise and remove cap from filter housing.

(Fig. 2) 2 stroke models, lever cap off using screw driver in slot in side of filter body.

To stop loose material falling into filter body, tilt upper handle so that filter body is up-side down. Remove filter element and seal ring.

(Fig. 3) Clean filter element "A" by tapping it on palm of hand. Do not use compressed air or wash with any liquid. Examine element for holes, splits or permanent clogging. Replace if necessary.

Dust-off seal ring "B" and examine. Replace if damaged or permanently crushed.

(Fig. 4) Fit or refit seal ring and filter element. Tilt upper handle back to normal position.

Push filter cap on, ensuring teeth engage in slots on filter housing.

Victa Air filter for all 2 stroke & 4 stroke domestic models Part No AF072825

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Remote Air Filter Maintenance – Aerogrip handles

1. Examine the air filter housing for holes, chafing and leaks. Replace it if damaged.

2. Remove the top cover of the air filter housing by squeezing the latch on the underside of the housing and lifting upwards.

3. Remove the element and the foam seal ring, taking care that any loose dirt does not fall into the filter body.
4. Dust off the seal and examine it. Replace it if damaged or permanently crushed. Refit seal to housing.

5. Clean the element by slapping it on the palm of your hand. Do not use compressed air or wash the element in any liquid. Examine the element for holes, splits or permanent clogging. Replace the element if necessary. Refit element to housing.
6. Refit the top cover by making sure the lugs at the rear of the cover are located before clipping in the latch.

MAINTENANCE & CARE

Maintenance Chart

Refer to the following table for routine maintenance.

Features	Requirements	Time Period						
		Before start	After finish	Refuelling	Weekly	Monthly	If faulty	If damaged
Lawnmower	Visual inspection (leaks)	•		•				
Throttle lever	Check operation		•					
Remote Air filter hose	Check	•				•		
Cutting System (Blades)	Inspect and check assembly	•						
	Replace						•	•
Rear flap	Inspect and check assembly	•						•
Chassis	Check for buildup of grass		•					
	Clean		•					
	Replace							•
Air filter	Check	•						
	Clean	•						
	Replace						•	•
Engine Cylinder fins	Clean					•		•
Spark plug	Replace						•	•
All accessible fasteners	Check	•						
	Retighten							•
Engine mounting bolts	Check & retighten					•		
Mulching plug	Inspect and check assembly	•						•
Muffler	Inspect					•		•
	Replace							•
Grasscatcher	Check	•						
	Clean		•					
	Replace							•

Before carrying out maintenance, STOP the engine, disconnect the spark plug lead from the spark plug and wedge it between the cylinder head fins. Remove the starter key from the ignition switch of Keystart models and disconnect the battery.

Never attempt maintenance that is not outlined in this manual. All repair work must be carried out by a VICTA Authorised Service Centre.

Troubleshooting

In small engines generally, difficult starting and erratic running is most often caused by a dirty spark plug. If a new spark plug of the correct type does not restore the engine to proper operating condition, the problem may be solved by reference to the chart below.

Problem	Possible cause	Correction
Does not start	Out of fuel Throttle lever in incorrect position Spark plug lead not connected Engine flooded Dirty spark plug Stale fuel in tank from last season Water in fuel tank Service required Engine worn Low or no oil (4 stroke)	Refill tank with correct fuel Refer to 'Starting Procedures' Press terminal cover fully onto the spark plug Turn fuel tap 'OFF'. Pull starter cord until engine starts, then turn fuel tap 'ON' Replace spark plug Contact Service Centre Contact Service Centre Contact Service Centre Contact Service Centre Check
Loss of Power	Incorrect throttle setting Dirty air filter element Too low height adjustment Low or no oil (4 stroke)	Set throttle lever in the 'RUN' position Clean or replace Raise cutting height Check
Poor cutting or catching	Blades worn or damaged Blade disc loose Slow running Blades restricted by grass and dirt accumulated under the baseplate Blocked vents in grasscatcher	Replace Contact Service Centre Refer to 'Loss of Power' above Remove spark plug lead and clean under the baseplate Clean vents
Excessive vibrations	Build up of grass and dirt on upper surface of blade disc Blades out of balance Bent or damaged disc or blade Looseness of assembly Low or no oil (4 stroke)	Clean Replace both blades Replace disc or both blades Check all nuts for tightness Check
Engine stops frequently	Fuel supply blocked Engine worn or seized Fuel cap not venting Low or no oil (4 stroke)	Check fuel line Contact Service Centre Check / Loosen cap slightly Check

If running difficulties continue, contact your closest VICTA Authorised Service Centre as listed in the back of this manual.

WARRANTY

Warranty

Consumer Rights

The buyer should be aware that in relation to goods which are of a kind ordinarily acquired for personal, domestic or household use or consumption, certain provisions such as the Trade Practices Act, 1974 (Aust) and the Consumer Guarantees Act, 1993 (NZ) apply. The terms set out below do not exclude rights and remedies implied by a statute which are non-excludable and which may be more extensive than those provided by this warranty.

Warranty Service

Warranty Service under both the Express Warranty and the warranties implied by law is available at any VICTA Authorised Service Centre. These centres are staffed and equipped to provide expert service.

VICTA Express Warranty

The VICTA Express Warranty is additional to the conditions and warranties which are mandatorily implied by the laws and regulations of the individual States and Territories of Australia and the Trade Practices Act, 1974 (Aust) and the Consumer Guarantees Act in New Zealand and any non-excludable laws.

Warranty Period

Domestic Models	Domestic Use	Commercial Use
Corvette 300, Pace, Clubsman Tiger, Hurricane, Hawk, Vortex, Silver Streak, Charger, Tornado Classic, Lawnkeeper	1 Year	3 Months
VSX - Engine only	3 Years	3 Months
Key Start - Battery only	6 Months	3 Months
Mulch or Catch	2 Years	3 Months
Victa Razor, Tornado, Tornado Edge, Mustang, Keystart, Statesman, Bronco, Corvette 400, Corvette 500, Lawnmaster, Mayfair, Panther, Wildcat, Tiger	2 Years	3 Months

Under Express Warranty the 'Lawnmower' is warranted from the date of purchase against mechanical defects and faulty workmanship or material. Express Warranty covers only the replacement, repair or adjustment of parts which fail due to a fault in manufacture. Defective parts will be replaced or serviced by an Authorised VICTA representative without charge for labour or materials, subject to conditions. Repairs or adjustments required by normal use or by failure to follow the manufacturer's instructions are chargeable to the owner.

VICTA Service Representatives or agents are authorised to determine whether a claim will be covered under warranty, or payable by the owner on completion.

Warranty

(cont.)

Conditions (cont.)

You should seek independent legal advice to determine whether a claim not covered by the Express Warranty is covered by any warranties implied by law.

- Express Warranty applies to the original purchaser only. Proof of purchase date must be provided prior to Express Warranty work.
- Use of parts other than genuine VICTA Spare Parts cancels the Express Warranty.
- Repairs other than by a VICTA Authorised Service Centre cancels the Express Warranty.
- Altering the product (including governed speed) cancels the Express Warranty..
- **A 'lawnmower' run with incorrect fuel, oil or oil level, is not covered by the Express Warranty.**
- Failure to properly service cooling or air filtration systems cancels the Express Warranty.
- Failure to follow the instruction manual or labels attached cancels the Express Warranty.
- Fair and reasonable wear is not covered by the Express Warranty.
- Damage from an accident, misuse or neglect is not covered by the Express Warranty.
- Costs of transportation of the 'lawnmower' are to be paid by the owner.
- **Blades and spark plugs are not covered by the Express Warranty.**

Limitations of Warranty

Nothing in these terms shall exclude, restrict or modify any term, condition, warranty or liability implied into this contract by statute, where to do so would be unlawful or would render any provision of this contract void. Subject to that, all warranties implied by statute in respect of the goods are hereby expressly negated and VICTA's liability for the goods is limited to any warranties issued in writing by VICTA and VICTA is excluded from any liability whether under this contract or otherwise to the buyer of any third party for any loss, injury, cost or damage (direct, indirect, special, consequential, or otherwise and whether or not arising from a negligent act or omission of VICTA), incurred or suffered by reason for the goods, their use, their design or any failure to deliver or delay in delivering them. Where it is legal to do so, any remaining liability implied by statute or resulting from breach of any term, condition or warranty implied by statute is limited to, at VICTA's sole option:

- the replacement of the goods or the supply of equivalent goods;
- the repair of goods;
- the payment of the cost of replacing the goods or of acquiring equivalent goods; or
- the payment of having the cost of the goods repaired.

In particular, your rights and remedies under the Trade Practices Act (Aust) and the Consumer Guarantees Act (NZ) are not excluded.
