PRODUCT BENEFITS

What does induction mean?

Induction technology uses magnetism to create heat in the base of a pot rather than in a cooking element below the cooktop surface.

This is a safer cooking system as the only heat in the cooktop surface is the transfer heat back from the pan. The cooktop surface remains cooler and easier to clean as spill overs will not char on the surface.

In addition to safety and easy cleaning, induction cooktops are faster and more responsive than traditional electric or gas cooktops. This has made Electrolux induction cooktops the choice of leading chefs like Tetsuya Wakuda for both his restaurant and home.

TECHNICAL DATA

model #:	EHD6685P
energy/heat source:	electric/induction
colour:	black
trim:	bevelled (sides only)
controls:	touch pad
left front cooking zone rating:	2300W (b-3700W)

Induction cooktops require pans with a sufficient magnetic content and the simple test as to whether your existing pans are suitable is whether a magnet will stick firmly to them.

More control than gas

Induction cooktops are faster, more responsive and give you more control than a gas hob.

With digital controls induction cooktops give you the high power for stir-frying as well as the most gentle delicate heat for melting chocolate with confidence.

Like gas the heat responds instantly as you adjust the controls.

Move ahead of gas and experience the many benefits of induction cooking.

Taking the heat out of cooking.

Induction cooktops keep your kitchen and cooking surfaces cooler for greater comfort and safety.

As there are no naked flames and the heat is created in the pan rather than passing through the cooktop surface, residual heat in the cooktop surface is substantially reduced with induction cooking.

Naturally this means surfaces are much easier to wipe clean, as spilt food is not burnt onto the hotplates or surrounds.

The kitchen environment also remains cooler increasing your own comfort while cooking.

Sleek, stylish finish.

With an easy to clean ceramic surface, this cook top fits seamlessly with the whole Electrolux Kitchen Collection

right front cooking zone rating:	1850W (b-2500W)
left rear cooking zone rating:	1850W (b-2500W)
right rear cooking zone rating:	1400W (b-1800W)
installation connection:	hard wired
product dimensions (w x d) mm:	590 x 520
type:	Ceramic Induction

PRODUCT FEATURES

touch pad controls

cooking timer with acoustic signal

A built-in minute minder conveniently manages your cooking. An acoustic signal alerts you when the cooking period is complete.

For even more convenience, the cooktop can be set to automatically turn the element off after the designated cooking/simmering period.

child lock

booster option on all zones

4 x residual heat indicators
